CHARACTERISTICS OF THE INDUSTRIAL DOCTORATE PROJECTS

The **essential element** of the Industrial Doctorates Plan is **the industrial doctorate project**, that is, a strategic research project carried out at a company that allows the doctoral student to further develop his research training in collaboration with a university, and which is the object of a doctoral thesis.

The **Government of Catalonia** provides **two types of financial support** to these projects, based on certain characteristics of project implementation:

- a. Industrial doctorate projects **co-funded by the Government of Catalonia**.
- b. Industrial doctorate projects with **specific funding**.

CHARACTERISTICS COMMON TO BOTH TYPES

→ The doctoral thesis will be carried out within the framework of a **collaboration agreement** between the university (and, if necessary, a research centre) and the company (more than one company may participate).

→ The candidate will be given a **thesis director** connected to the university or research centre and a **project manager appointed by the company**.

→ The candidate will be selected jointly by the signatories of the collaboration agreement. However, the candidate must be accepted and admitted to the doctoral programme of the corresponding university.

→ The candidate must have an **average mark of 6.5** or higher (scale 1 to 10) on his or her academic transcript, calculated based on all credits of university studies that allow admission to a doctoral programme.

→ The thesis director must be part of an active **recognised research group (SGR)** of the Government of Catalonia or a **researcher from the ICREA** programme or be a recipient of **European Research Council (ERC) funding**.

→ The time dedicated by the doctorate student to the research projects will be divided between the company and the university..

→ The candidate will take part in **training programmes in specific skills** related to R&D&I project leadership, coordination and management; the transfer of research results; new business development; and industrial and intellectual property, among other relevant subjects.

→ The candidate will be given a yearly stipend (**mobility fund**), funded by the Government of Catalonia and accumulative for a maximum period of 3 years. Its purpose is to enable attendance at workshops and conferences related to the research project as well as stays at other company offices, universities or research centres outside Catalonia.

→ All theses defended under the Industrial Doctorates Plan will receive an **Industrial Doctorate with distinction**. The participating companies and academic directors will also receive acknowledgement for their participation in the Plan.

Data provided by applicants will form part of a file owned by the AGAUR in order to manage their participation in the industrial doctorate project. Said management may at times involve certain data being given to third parties in the public or private sphere, as their intervention in the management process may be necessary to ensure that the final outcome is handled correctly, or to establish a regulation with legal status.

Applicants may exercise their right to access, amend, delete and/or oppose the use of data by contacting us in writing at Passeig de Lluís Companys, 23, 08010 Barcelona, or via e-mail at lopd@agaur.gencat.cat, attaching a photocopy of their national ID document (DNI) or by signing the e-mail with a recognised form of electronic signature.

In accordance with Article 11 of Organic Law 15/1999, of 13 December, on personal data protection, I hereby authorise the AGAUR to provide the university and company with my personal and academic details, as part of the framework within which the industrial doctorate project for which I am applying will be carried out, for the sole purpose of management and assessment and, if applicable, the selection of my application.
